To prepare individuals to enter the health care industry as competent, entry-level health care providers.

Instruction includes keeping proper patient records and an overview of legal and ethical issues affecting the dental profession. Students study head and neck anatomy, tooth identification and morphology, dental terminology, infection control and instrumentation. Numerous chair-side procedures practiced in the classroom and lab include digital and manual x-rays, impressions, study models, dental charting, suctioning, and passing instruments. Job shadowing and work-based learning assignments also enable the students to expand their knowledge and skills through assisting the dentist and dental team. *(Additional cost of books and supplies approx.: $1,046)*

• **OCCUPATIONAL CHARACTERISTICS**

(Information obtained from the US Dept. of Labor Statistics Occupational Outlook Handbook)

Dental assistants work closely with, and under the supervision of, dentists. Dental assistants should not be confused with dental hygienists, who are licensed to perform different clinical tasks.

Dental assistants sterilize and disinfect instruments and equipment, prepare and lay out the instruments and materials required to treat each patient, and obtain patients’ dental records. Assistants make patients as comfortable as possible in the dental chair and prepare them for treatment. During dental procedures, assistants work alongside the dentist to provide assistance. They hand instruments and materials to dentists and keep patients’ mouths dry and clear by using suction or other devices. They also instruct patients on postoperative and general oral health care.

Dental assistants may prepare materials for impressions and restorations, take dental x rays, and process x-ray film as directed by a dentist. They also may remove sutures, apply topical anesthetics to gums or cavity-preventive agents to teeth, remove excess cement used in the filling process, and place rubber dams on the teeth to isolate them for individual treatment. Some States are expanding dental assistants’ duties to include tasks such as coronal polishing and restorative dentistry functions for those assistants that meet specific training and experience requirements.
