Autry Technology Center Offers Educational Opportunities for Everyone

ENID, Okla. – Since 1967, Autry Technology Center has served the Enid community and surrounding areas with one goal in mind – providing a productive and prepared workforce for employers in Oklahoma. As one of 29 CareerTech schools across Oklahoma, Autry Tech offers more than 25 full-time career programs, numerous short-term continuing education courses and customized training opportunities through Business & Industry services.

Full-time career programs run on a traditional school calendar – August through May at Autry Technology Center. Autry offers 20+ full-time programs, enrolling just under 700 high school and adult students each year.

Full-time programs include Air Conditioning & Refrigeration Technology, Automotive Technology, Business Management & Entrepreneurship, Clinical Medical Assisting, Collision Repair Technology, Computer-Aided Drafting & Design, Construction Technology, Cosmetology, Culinary Arts, Dental Assisting, Early Care & Hospitality, Graphic Arts, Health Careers, Industrial & Mechanical Technology, Information Technology, Power Products Technology, Robotics & Electronic Automation and Welding Technology. Autry Tech also offers five adult-only advanced medical programs in areas like MRI, Practical Nursing, Radiography, Respiratory Care and Surgical Technology. Autry Tech also serves as a regional host site for the Oklahoma School of Science and Mathematics.

“One of our goals in full-time programs is to ensure every student in Garfield County has a plan following high school graduation,” said Mandy Mayberry, Director of Marketing, Communications & Recruiting. “We work hard to ensure our full-time students gain the hands-on training and skills they need to be successful in the workforce.”

Enrollment for full-time programs begins in January and continues through August. In-district high school juniors and seniors can attend a full-time program tuition free. The Autry Scholarship is available to recent high school graduates who (1) live in the Autry district, (2) lived in the Autry district during their senior year in high school, and (3) meet enrollment guidelines. Students may attend during any or all of the three years immediately following high school graduation.

Short-term continuing education courses are geared toward individuals seeking career or personal growth and employers investing in the advancement of their workforce. Autry Tech offers a wide variety of short-term courses with flexible class times. Areas of interest include Agriculture, Food & Natural Resources, Architecture & Construction, Arts & Communications, Business Management & Leadership, Health Science, Hospitality & Human Services, Information Technology, Manufacturing & Trades, Public Safety & Law and Transportation.

Autry Tech also partners with more than 500+ local businesses each year through customized training opportunities. Customized training courses are designed to meet specific needs of industry partners, allowing the employer to keep up in today’s fast-changing and competitive work environment.

“The driving force of the Oklahoma CareerTech system is fill the workforce with qualified workers and set our future generations up for success,” said Brady McCullough, Superintendent/CEO at Autry Technology Center. “Here at Autry Tech, we continue our vision of being the workforce capital by providing state-of-the-art technology, expert resources and guaranteed satisfaction.”

For more information about Autry Technology Center and its programs, visit autrytech.edu or call 580.242.2750.

Autry Technology Center has been a part of the Enid community since 1967 and is one of 29 CareerTech schools across Oklahoma. The center has more than 25 career programs and offers a wide variety of evening and weekend short-term courses and certifications for many diverse career fields. Autry serves nearly 16,000 individuals each year, including many area employees who receive training through the Business and Industry Services Department that works with over 500 local businesses each year.
