Autry Technology Center Names May Students of the Month

ENID, OKLA. — Autry Technology Center has named three students as the May Students of the Month. These students were selected based on their performance in and out of the classroom as students, role models and future professionals.

Callum Wright is a second-year adult student in the Computer-Aided Drafting & Design program at Autry Technology Center. He also completed the Construction Technology program at Autry Tech. He graduated from Oklahoma Bible Academy in 2020.

Wright serves as the Post-Secondary Rep for Autry Tech’s SkillsUSA PM Chapter as well as an Autry Professional Representative for his program. Wright came to Autry Tech when he was in sixth grade and took part in the Teen Tech event in the Construction Technology program. After graduation from OBA, Callum chose to attend Autry because he knew it was the most cost-effective education to learn a trade while working with his hands.

“He is a great student and works hard,” said Todd Anderson, Autry Tech Computer-Aided Drafting & Design instructor. “He has many talents outside of design. He can build cabinets and is always building things. What has impressed me the most about Callum is his morals and kind heart. Teachers and his peers respect him as a person. He is an outstanding leader, always more than willing to help others and is a great example of what a servant leader is.”

Wright recently received an offer to work at Wallace Engineering in Tulsa after he completes his training at Autry Tech.

Kloey Bradford is a first-year high school student in the Health Careers program at Autry Technology Center. She is also a junior at Enid High School. She is pre-enrolled for Autry Tech’s Clinical Medical Assisting program for the 2022-2023 school year.

“Kloey is a hero!” said Lois McCullough, Autry Tech Health Careers instructor. “We train our students all year long in soft skills, team work, clinical skills, and life-saving skills in the hopes that our students will go out and get a job in the workforce. Never in our wildest dreams do we expect one of our students to put what they have learned to use before they have even graduated. But Kloey did. She used her training from stop the bleed, first aid, and CPR classes to help a neighbor in the time of emergency! I could not be more proud of her. She is a true hero in my books and will make an excellent healthcare worker.”

After high school graduation, she would like to go to college and attend Autry Tech’s Respiratory Therapy program.

Noah Riley is a first-year high school student in the Information Technology program at Autry Technology Center. He is also a junior at Oklahoma Bible Academy (OBA). He is a member of the Chess Club at both Autry Tech and OBA.

“Noah performs very well in our program and is always ahead of the schedule in his courses,” said Melissa Hula and Jake Roberson, Autry Tech Information Technology instructors. “He is a critical thinker and has an aptitude in the IT area. He is focused, on task, and works diligently on every assignment. We always know we can count on Noah if we need assistance with activities inside and outside of the classroom.”

He is unsure of his long-term future plans but may pursue a master’s degree in divinity.

Autry Technology Center has been a part of the Enid community since 1967 and is one of 29 CareerTech schools across Oklahoma. The center has more than 25 career programs and offers a wide variety of evening and weekend short-term courses and certifications for many diverse career fields. Autry serves nearly 16,000 individuals each year, including many area employees who receive training through the Workforce Development Department that works with over 500 local businesses each year.
